OSMO TINTING SYSTEM

- 3 ABOUT OSMO
- 4 TINTING SYSTEM OVERVIEW

INTERIOR WOOD FINISHES

- 5-6 **POLYX®-OIL ORIGINAL**
Add a subtle tint of colour. Recommended for many interior wooden surfaces; floors, furniture, worktops, and more.
- 7-8 **POLYX®-OIL RAPID**
A quicker drying version of the Original. Recommended for many interior wooden surfaces; floors, furniture, worktops, and more.
- 9-12 **WOOD WAX FINISH**
An endless variety of colour choice with varied intensity. Recommended for all interior wooden surfaces; floors, furniture, walls, ceilings, and more.
- 13-14 **OIL STAIN**
Professional results with variable intensity of colour. Recommended for interior wooden surfaces; flooring, furniture, stairs, etc.

EXTERIOR WOOD FINISHES

- 15-18 **UV-PROTECTION OIL & UV-PROTECTION OIL EXTRA**
Add a subtle tint of colour. Recommended for all vertically structured exterior wooden surfaces; cladding, fencing, garden buildings, pergolas, and more.
- 19-20 **DECKING-OIL**
Colours especially suited to preserve the natural colour and characteristics of wood species used for exterior decking and furniture.
- 21-22 **NATURAL OIL WOODSTAIN**
An endless variety of colour choice. Recommended for all exterior wooden surfaces; cladding, fencing, garden buildings, and more.
- 25-26 **COUNTRY SHADES**
Endless opaque colour choices. Recommended for many exterior wooden surfaces; garden buildings, cladding, fencing, play equipment, and more.

ABOUT OSMO

Osmo is the specialist when it comes to an optimal interplay between wood and coating systems. The careful handling of natural resources combined with offering the best value for money, the best workability and high product coverage is what lies near and dear to our hearts.

Osmo coating systems utilise only a minimal amount of solvents, thanks to the High Solid formula. This results in reduced solvent emissions during application while delivering extended wood surface coverage as well as enhancing the longevity and the durability of the wood finish.

Deep research and development into colour has enabled Osmo to offer a vast range of new colour, creating a tailored experience for each individual. With high solid, high quality and high coverage – Osmo has the solution.

TINTING SYSTEM OVERVIEW

The Osmo Tinting System becomes possible with an automatic paint dispenser to efficiently produce high quality interior and exterior Osmo natural wood finishes from an endless variety of transparent and opaque colours.

More Information

1 CHOOSE YOUR PRODUCT

POLYX®-OIL ORIGINAL

Extremely hardwearing and durable for many interior wooden surfaces (with exception to ingredient-rich wood species)
e.g. flooring, furniture and joinery.

2 CHOOSE YOUR COLOUR

The standard colours are slightly tinted and transparent, allowing the wood's natural grain to remain visible after application.

More Information

POLYX®-OIL 3074 GRAPHITE

1 CHOOSE YOUR PRODUCT

WOOD WAX FINISH

Extremely hardwearing and durable for all interior wooden surfaces (with exception to ingredient-rich wood species) e.g. flooring*, furniture and joinery, walls, ceilings, and more.

**Only one coat of Wood Wax Finish is recommended on flooring, followed by a clear Polyx®-Oil.*

2 CHOOSE YOUR COLOUR

The standard colours are slightly tinted, transparent and intensive, allowing the wood's natural grain to remain visible after application. However for the intensive colours, these characteristics become hidden after the second coat offering an opaque colour finish.

TRANSPARENT COLOURS

1 CHOOSE YOUR PRODUCT

OIL STAIN

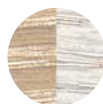

Professional results with variable intensity of colour for interior wooden surfaces such as flooring*, furniture, stairs, etc.

**For flooring, Oil Stain requires a clear top coat of Polyx®-Oil to create a durable surface.*

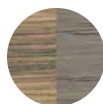

2 CHOOSE YOUR COLOUR

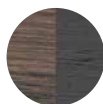

The standard colours are slightly tinted, transparent (one coat) and intensive (two coats) colours allowing the wood's natural grain to remain visible after application. If a stronger colour is desired, apply two coats of Oil Stain to achieve an almost-opaque intensive colour.

CHOOSE YOUR PRODUCT

UV-PROTECTION OILS

Ideal for all vertically structured wood surfaces such as cladding, fencing, garden buildings, solid doors and more. Not recommended for horizontally structured surfaces such as decking, tables, benches, etc.

SUPPORTING A HEALTHY LIVING ENVIRONMENT

UV-PROTECTION OIL 410

Use 410 base on its own without a colour tint to provide a clear finish which supports a healthy living environment without the use of biocides to ensure the dry finish is safe for humans, plants and animals.

EXTRA PROTECTION

UV-PROTECTION OIL **EXTRA 420**

Use 420 base on its own without a colour tint to provide a clear finish which contains biocides to additionally protect against algae, mildew and fungal attack.

2 CHOOSE YOUR COLOUR

The standard colours are transparent to allow the wood's natural grain to remain visible, while becoming highly UV-resistant – the darker the colour, the stronger the UV-resistance.

UV-PROTECTION OIL 431 LIGHT RED CEDAR

1 CHOOSE YOUR PRODUCT

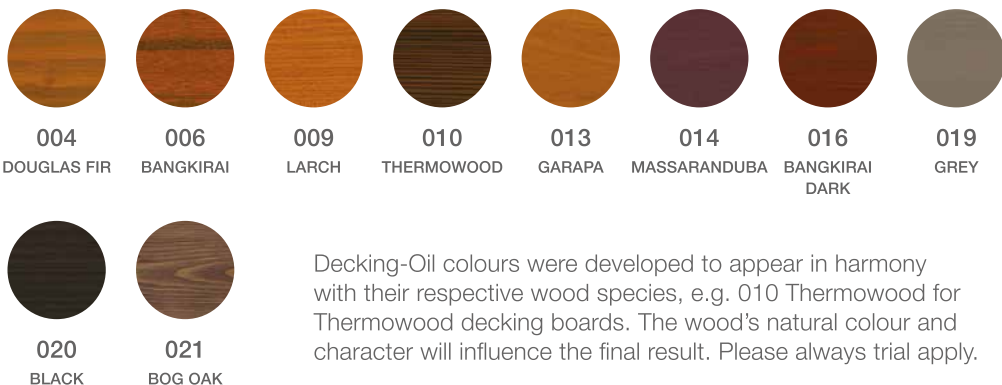

DECKING-OIL

Ideal for exterior wood decking and garden furniture. Especially suitable for hardwoods, although a weathering period is recommended depending on the wood species.

2 CHOOSE YOUR COLOUR

The standard colours allow you to slightly tint your wood with a transparent colour finish which allows the wood grain to be visible. A clear finish is not available for this product.

Decking-Oil colours were developed to appear in harmony with their respective wood species, e.g. 010 Thermowood for Thermowood decking boards. The wood's natural colour and character will influence the final result. Please always trial apply.

ADDITIONAL COLOURS

Alternatively, choose a colour from any of the standard colour ranges within this brochure, such as Polyx®-Oil 3071 Honey, Wood Wax Finish 3143 Cognac, UV-Protection Oil 425 Oak, and Natural Oil Woodstain 732 Light Oak.
