#### **SECTION 4: First aid measures** 4.1 Description of first aid measures General information: Immediately remove any clothing soiled by the product. After inhalation: Supply fresh air; consult doctor in case of complaints. Take affected persons out into the fresh air. Keep warm, position comfortably and cover well. In case of irregular breathing or respiratory arrest provide artificial respiration. Supply fresh air or oxygen; call for doctor. Seek medical treatment in case of complaints. In case of unconsciousness place patient stably in side position for transportation. Immediately wash with water and soap and rinse thoroughly. After skin contact: Immediately remove any clothing soiled by the product. In case of skin reactions, seek medical advice. After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor. After swallowing: If swallowed, seek medical advice immediately and show this container or label. Rinse mouth. Do not induce vomiting; call for medical help immediately. 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available. 4.3 Indication of any immediate medical attention and special treatment needed No further relevant information available.

#### **SECTION 5: Firefighting measures**

5.1 Extinguishing media	
Suitable extinguishing agents:	CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
For safety reasons unsuitable	Water with full jet
extinguishing agents: 5.2 Special hazards arising from	water with full jet
the substance or mixture	In case of fire, the following can be released:
	Carbon monoxide (CO)
	Combustible liquid. In a fire of if heated, a pressure increase will occur and the
	container may burst, with the risk of a subsequent explosion.
5.3 Advice for firefighters	Promptly isolate the scene by removing all persons from the vicinity of if there is a fire.
	No action shall be taken involving any personal risk or without suitable training.
	Move container from fire area if tis can be done without risk.
	Use water spray to keep fire-exposed containers cool.
	This material is very toxic to aquatic organismen.
	Fire water contaminated with this material must be contained and prevented from being
	discharged to any waterway, sewer or drain.

Protective equipment:	(Contd. of pag Wear self-contained respiratory protective device.
	Fire-fighters should wear appropriate equipment and selfcontained breathing appara (SCBA) with a full face-piece operated in positive pressure mode.
SECTION 6: Accidental rel	ease measures
6.1 Personal precautions, protective equipment and	
emergency procedures	No action shall be taken involving any personal risk or without suitable training.
<b>6 1</b>	Wear protective equipment. Keep unprotected persons away.
	Do not touch or walk through spilt material.
	Keep away from ignition sources.
	Do not breathe vapour/spray.
	Ensure adequate ventilation
	Wear protective clothing.
6.2 Environmental precautions:	Inform respective authorities in case of seepage into water course or sewage system.
-	Do not allow to enter sewers/ surface or ground water.
	Very toxic to aquatic organisms, may cause long-term adverse effects in the aqua
	environment.
	Do not allow product to reach sewage system or any water course.
6.3 Methods and material for	
containment and cleaning up:	Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders
	Dispose contaminated material as waste according to item 13.
	Ensure adequate ventilation.
	Warm water and cleansing agent
6.4 Reference to other sections	See Section 7 for information on safe handling.
	See Section 1 for emergnecy contact information.
	See Section 8 for information on personal protection equipment.
	See Section 13 for disposal information.
SECTION 7: Handling and	storage
7.1 Precautions for safe handling	Store in cool, dry place in tightly closed receptacles.
Information about fire - and	
explosion protection:	Protect from heat.
	Protect against electrostatic charges.
	Flammable gas-air mixtures may form in empty receptacles.
	Keep ignition sources away - Do not smoke.
7.2 Conditions for safe storage, in	cluding any incompatibilities
Storage:	-
Requirements to be met by	
storerooms and receptacles:	Store in a cool location.
	~
	Store only in the original receptacle.

Additional information:	The lists valid during the making were used as basis. Observe European Standard EN 689 (Workplace atmospheres - Guidance for the
	assessment of exposure by inhalation to chemical agents for comparions with limit
	values and measurement strategy)
	Observe European Standard EN 14042 (Workplace atmospheres - Guide for the
	application and use of procedures for the assessment of exposure to chemical and biological agents.)
8.2 Exposure controls	
Personal protective equipment:	
General protective and hygienic	
measures:	Wash hands before breaks and at the end of work.
	Do not eat, drink, smoke or sniff while working.
	Immediately remove all soiled and contaminated clothing
	Do not carry product impregnated cleaning cloths in trouser pockets.
	Avoid contact with the eyes and skin.
<b>Respiratory protection:</b>	Use suitable respiratory protective device in case of insufficient ventilation.
	Use a properly fitted, air-purifying or air-fed repirator complying with an approved standard if a risk assessment indicates this is necessary.
	Short term filter device:
	Full mask with type ABEK filter.
Protection of hands:	Chemical-resistant, impervious gloves complying with an approved standard should be
	worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Material of gloves	The selection of the suitable gloves does not only depend on the material, but also on
	further marks of quality and varies from manufacturer to manufacturer. As the product (Contd. on page 6)
